Designer Authoring (Yammer and Balsamiq): Edit and organize content visually with Yammer and Balsamiq. Draft and review business content in a browser window and explore concepts with Yammer's free basic version. Or jump into Balsamiq for rapid prototyping. Both tools let you synchronize and collaborate with coworkers and other teams using co-authoring. (video: 1:07 min.) CAM and CAM-Pro: Get a better understanding of your CAM setups by exploring the database CAM itself has created over the years. Includes all of your CAM paths and is searchable by part, location, material, tool, and other parameters. Plus: support for even more CAM tools to create computer-aided manufacturing (CAM) paths and drill and counterbore paths (CAM-Pro). (video: 1:34 min.) Newly added to the functionality in AutoCAD: Leverage your CAD experience for the classroom with the new Teacher Console. Free to try, this tool allows you to send students the AutoCAD syntax of a drawing, be notified of progress or when students finish, and the ability to review your students' drawings. (video: 1:23 min.) Automatic recognition of an edited drawing when you return to a drawing: Create a drawing that you'll draw frequently, and whenever you open it, AutoCAD will remember where you left off. That way you'll get the context of your work on any subsequent drawings you open. See details in the release notes: [Autodesk.com/CAD-2023](https://autodesk.com/CAD-2023) Improved: The right-click and Alt+Enter actions: Use the right-click or Alt+Enter to open a dialog box with more options for the action you are performing. This includes a change-type field that allows you to display the name of a file or the name of a tool. You can easily copy a selected tool, group, path, or region to the clipboard. The paste option now includes a show-or-hide-menu that makes it easier to select the correct pasting option. When you draw a line, a circle, or a polyline, the arc object options now show more clearly. In addition to the standard performance enhancements, other improvements in this release include: Performance: Improved drawing performance
