
Iobit Internet Booster Settings PATCHED

Especially some adware programs that can significantly slow down your Internet speed by inserting a large number of advertisements into your web page. In it, go to your browser settings, ... and select the Security tab. Then select the Internet zone. Select the "Other" option and click the "Other" button. Enter the code from the image and click the Check button. If you don't see any messages and your browsing history doesn't show any sites you've visited, then you've got a proper malware block. To remove the lock, simply click the Delete button. 1. Go to www.microsoft.com/security_center 2.
